PROFESSIONAL SUMMARY

Data Science student (B.Sc., 2026) with hands-on experience building end-to-end ML pipelines, interactive dashboards, and deployed Streamlit applications. Proficient in Python, scikit-learn, SQL, Tableau, and Power BI. Demonstrated ability to derive actionable insights from real-world datasets across prediction, classification, and trend analysis tasks. Hackathon award winner with proven ability to ship production-ready AI systems.

TECHNICAL SKILLS

Languages & Databases: Python, SQL, Excel.

ML & Data Science: scikit-learn, Random Forest, Logistic Regression, XGBoost,

Data & EDA: pandas, NumPy, matplotlib, seaborn, Feature Engineering.

Visualization & Dashboards: Tableau, Power BI, Streamlit

Tools & Platforms: VS Code, Google Colab, GitHub (Git), Cursor, Antigravity, Open Code, Claude Code.

EXPERIENCE

Freelance — Management Assistant Head (Department of Data Science) 2023 – Present

The American College, Madurai

- Established department data tracking system using Excel and Google Sheets, automating report generation for 15+ team members and reducing weekly reporting time by 40%.
- Coordinated documentation workflows for 5+ departmental events annually, improving cross-team handoff efficiency and eliminating last-minute documentation gaps.

Freelance — Web & Application Developer

2026

DATA VAGANZA — Department Symposium, The American College

- Delivered the official event website and registration application end-to-end for 200+ participants, maintaining 100% uptime throughout the event duration.
- Managed full deployment lifecycle from development to live production, ensuring zero downtime across the entire event.

PROJECTS

VAULT-Aegis — AI Security Gateway | *Python • FastAPI • Streamlit • spaCy*

- Architected a zero-trust security layer for LLM deployments as part of a hackathon team, covering the full threat surface from API gateway to inference pipeline.
- Engineered prompt injection & jailbreak defence, PII sanitization (7+ data types), and OWASP API scanning; reduced simulated attack success rate to near zero.
- Won 1st Prize at Thiagarajar College of Arts & Science Hackathon, Madurai.

Video Games Sales Analysis & Prediction | *Python • Random Forest • XGBoost • scikit-learn • Pandas*

- Profiled multi-region video game sales (NA, EU, JP, Global) across 16,000+ titles, surfacing platform dominance trends and genre-level distributions through matplotlib and seaborn EDA.
- Engineered game age feature and applied one-hot encoding across platform/genre dimensions; benchmarked Linear Regression, Random Forest, and XGBoost Regressors for global sales prediction.
- Selected Random Forest as best model ($R^2 = 0.84$, MAE = 0.017, RMSE = 0.836) and deployed a prediction system accepting platform, genre, year, and publisher as inputs.

Land Documentation Approval Prediction | *Python • Logistic Regression • Random Forest • Streamlit*

- Trained Logistic Regression and Random Forest classifiers on land documentation data; Random Forest improved Precision by 33% (0.22 → 0.30) and F1-score 3x (0.05 → 0.16) over baseline.
- Deployed results via an interactive Streamlit dashboard enabling real-time approval prediction for end users.

Gaming Addiction Prediction | [Python](#) • [EDA](#) • [Survey Data](#) • [Streamlit](#)

- Extracted behavioural patterns linked to gaming addiction from real-world survey data using pandas, seaborn, and matplotlib, identifying top 5 risk indicators through feature selection.
- Delivered a Streamlit dashboard presenting EDA insights and prediction results to non-technical audiences.

Laptop Price Prediction | [Python](#) • [Random Forest](#) • [Dashboard](#)

- Optimized a Random Forest regression model for laptop price prediction, achieving $R^2 = 0.88$ on test set across 1,000+ device configurations.
- Produced an interactive feature importance dashboard enabling data-driven pricing strategy decisions.

London Bike Ride Analysis | [Python](#) • [Tableau](#)

- Uncovered seasonal and weather-driven demand patterns in historical ride data, processing multi-year records using Python.
- Quantified ~23% higher weekend demand during summer months, providing actionable insight for capacity planning.

EDUCATION

Bachelor of Science (B.Sc.) in Data Science

CGPA—8.5 2023 – 2026

[The American College, Madurai \(Affiliated to Madurai Kamaraj University\)](#)

Relevant Coursework: Machine Learning, Statistics, DBMS, Data Analysis, Python, Data Mining, Big Data Analytics, AI

High School Diploma

[Devangar Higher Secondary School, Chinnalapatti, Dindigul, Tamil Nadu](#)

CERTIFICATIONS

- Google Analytics — Google
- Prompt Engineering — AWS
- AI Agents — Hugging Face
- Data Visualization Virtual Internship — TATA
- Data Analytics and Visualization Virtual Internship — Accenture
- Data Analysis — Microsoft & LinkedIn
- Generative AI — Microsoft & LinkedIn

LANGUAGES

Tamil — Read, Write, Speak, Listen (Native)

English — Read, Write, Speak, Listen (Professional)

Kannada — Speak, Listen
